

The Protection of Water (2021)

Aquatika – Freshwater Aquarium
Karlovac, Croatia.

Primary School Grabrik, Karlovac.
Nela Bolfek, 4th.

In class, we talked about protecting the water and how really important water is to our lives and the planet, so we decided to make pictures using wooden colours and some felt tip pens that would describe the importance of water in our role in protecting it from disappearing. Water in Croatia is still clean, and I am the one who will protect its cleanliness in the future.

The Protection of Water (2021)

Aquatika – slatkovodni akvarij Karlo-
vac, Hrvatska.

OŠ Grabrik, Karlovac.

Nela Bolfek,4.

U razredu smo razgovarali o zaštiti vode i koliko je voda zaista važna za naše živote i planet, pa smo odlučili napraviti slike pomoću drvenih boja i nekoliko flomastera koje bi opisale važnost vode u našoj ulozi u zaštiti od nestajanje. Voda u Hrvatskoj je još uvijek čista, a ja sam taj koji će ubuduće čuvati njenu čistoću.
