

Rivers Are The Veins Of The World (2020)

Water Museum of Venice & Consorzio di Bonifica 'Acque Risorgive', Italy.
Primary School 'Nelson Mandela', Mogliano/Olme. Classes 4A-4B.

Today, our territory is fragile and altered due to pollution, excessive river transformations and human interventions.

In the frame of the collaboration among the Water Museum of Venice, the Land Reclamation Board 'Acque Risorgive' (Resurgence Waters) and the non-profit association Civiltà dell'Acqua International Centre, educational activities focusing on good practices of river requalification aimed at preserving the typical fauna and flora of local watercourses were conducted. The vital functions of aquatic ecosystems and the values of biodiversity were analysed, stimulating the creativity of young generations through the flowing forms of water and its expressions of life.

Rivers Are The Veins Of The World (2020)

Muzej vode u Veneciji & Consorzio di Bonifica 'Acque Risorgive', Italija.
Osnovna škola 'Nelson Mandela', Mogliano/Olme. Razredi 4A-4B.

Danas je naš teritorij krhak i izmijenjen zbog zagađenja, pretjeranih preobrazbi rijeka i ljudskih intervencija.

U okviru suradnje između Muzeja vode u Veneciji, Odbora za melioraciju 'Acque Risorgive' (Resurgive Waters) i neprofitne udruge Civiltà dell'Acqua International Centre, obrazovne aktivnosti usmjerene na dobre prakse prekvalifikacije rijeka s ciljem očuvanja provedena je tipična fauna i flora lokalnih vodotoka. Analizirane su vitalne funkcije vodenih ekosustava i vrijednosti biološke raznolikosti, potičući kreativnost mladih generacija kroz tekuće oblike vode i njezine izraze života.
