

## The Beauty of Nature (2024)

In this picture I drew a duck happy swimming in Chadwick Lakes. Unfortunately, it is not in the perfect habitat since someone left it there and the valley is not her home. The valley is a place to admire and relax in. Without plants we can't breathe fresh air and thanks to these places we can do so. In Malta since we don't have too much rain we have to be careful not to waste water and also take good care of these places where rain water is being conserved. So, by doing some water saving tips we can work together because every drops counts.
